Q. Display a message “Done!” after successful execution of loop.

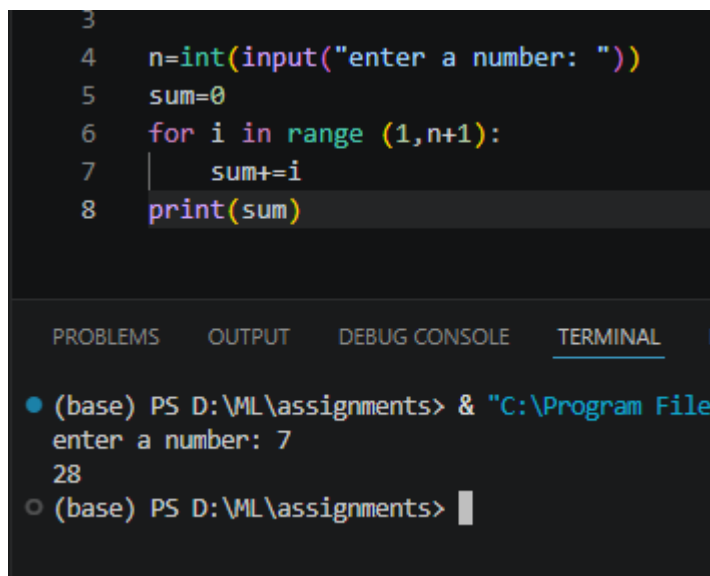

The screenshot shows a code editor with a Python script and its execution output. The script is as follows:

```
1 for i in range (10):
2     print(i)
3 else:
4     print("Done!")
```

The output of the script is shown in the terminal window below the code editor:

Q. Calculate the sum of all natural numbers from 1 to N.

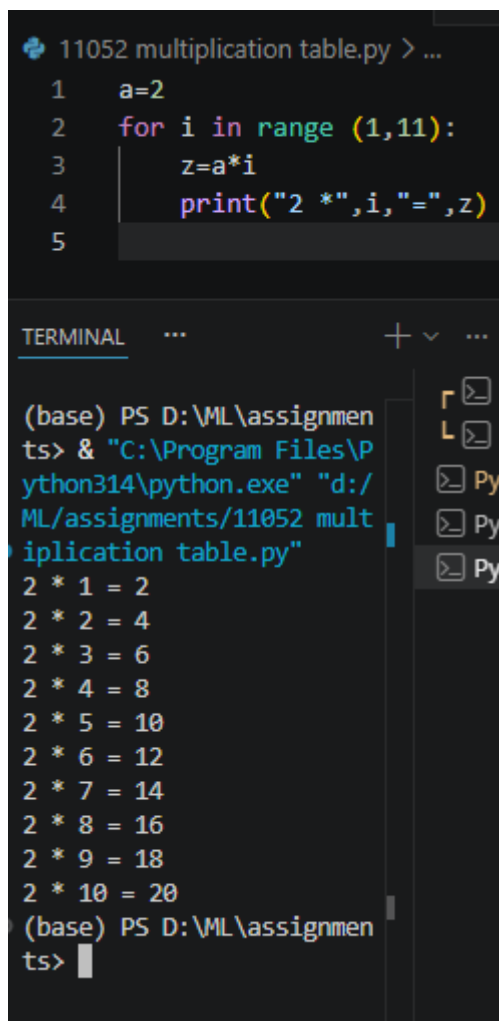

The screenshot shows a code editor with a Python script and its execution output. The script is as follows:

```
3
4 n=int(input("enter a number: "))
5 sum=0
6 for i in range (1,n+1):
7     sum+=i
8 print(sum)
```

The output of the script is shown in the terminal window below the code editor:

Q. Print multiplication table of a given number. (Given input= 2)

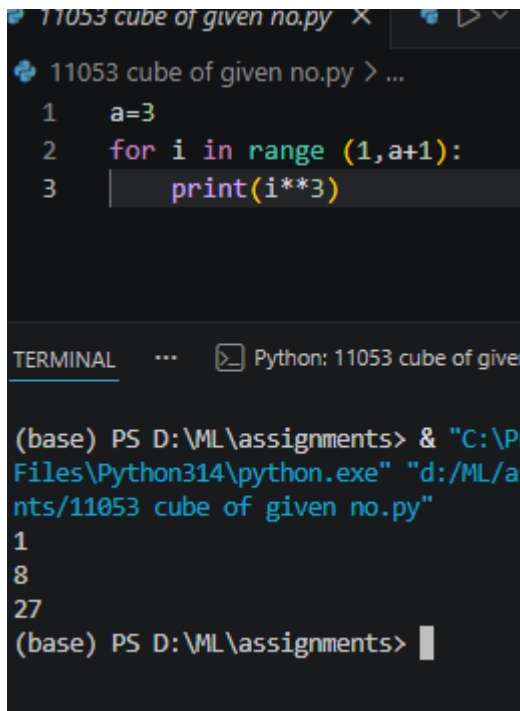

The image shows a code editor window with a file named '11052 multiplication table.py'. The code is as follows:

```
1 a=2
2 for i in range (1,11):
3     z=a*i
4     print("2 *",i,"=",z)
5
```

Below the code editor is a terminal window. It shows the command to run the script using Python 3.14, and the output of the script, which is a multiplication table for the number 2 from 1 to 10.

```
